<i>6. Immunohistochemistry</i>			
Immunohistochemistry staining using antibodies are of key value in histopathology particularly in oncology. There are nearly 120 IHC available currently in practice. These tests are usually added according to the initial result of the biopsy that involve all organs and all types of specimens mentioned before (1-5). For pricing purposes, it is recommended to add a cost of 15 R.O. for each immunohistochemistry marker applied for a case. The markers are mentioned in abbreviations or words under immunohistochemistry title of each report e.g. CK= 15 RO, LCA= 15 RO, Vimentin= 15 RO, ....,and so on.
